

This is why I Daisy Wingo should be chosen for the \$1000 dollar scholarship

Hello, my name is Daisy and I am 14. I may be young but I really can make a huge difference in the world and the reason I wish to be one of the people who receive this 1,000 dollar kindness scholarship is that the fact that I may be young but I have noticed that Raton has a rising problem and that's due to inflation, which effects elderly people who are out due to a disability, and most can't afford their basic needs. If I were to receive the \$1000, I would split it in half and then save 500 and then take the other \$500, and divide it 4 ways which would leave 125 dollars for four different fundraisers and I could team up with student senate, FCCLA, the baking club/class, the kitchen workers, and so much more to help me with the fundraisers.

The profits from the fundraisers would be used to make care packages to give out to the elderly who need the help the most. I could easily team up with my catechism classes to help me make care packages and give them away, and then I could team up with a local restaurant or business to help give meals away. Teaming up can help us connect to the community also.

I could take and use the remaining \$500 in another fundraiser for example selling cookies or doing yard work to get enough money to pay for meals to give away by teaming up with a meal-providing service or business to buy meals so that I can continue to help. I want to get more hands-onboard with it so that I can double the group sizes and possibly even have more ideas to help the elderly of this community. I am aware that I will probably have to expand my group in order to expand my organization and help more people. I look forward to being able to help people with this scholarship offer and hope this will life changing to the ones I help.
