

# **Sunrise Clinics Expands School and Community Care with TytoCare's Pro Smart Clinic**

## **Following Its Mission to Remove Access Barriers, Sunrise Clinics Will Deploy TytoCare in 18 School-Based Health Centers and Plans Expansion into Clinic Sites Across New Mexico**

*Santa Rosa, NM and New York, NY, November 4, 2025* – Sunrise Clinics, a Community Health Center serving rural and underserved communities across New Mexico, announced today that it is expanding its care capabilities through the deployment of TytoCare's Pro Smart Clinic technology. With funding from the Rural Health Care Delivery Fund, Sunrise Clinics will introduce the Pro Smart Clinic into all 18 of the school-based health centers it operates, significantly improving access to prompt care for children and families.

TytoCare's Pro Smart Clinic lets clinicians perform exams remotely as they would during an in-person clinic visit, including heart and lung exams, which include TytoCare's AI-powered Respiratory Suite, throat and ear exams, and skin and temperature assessments. These capabilities ensure that patients in 2,500 schools across the US receive high-quality care without the delays and barriers that often prevent swift treatment and keep students out of the classroom.

The initiative builds on Sunrise Clinics' mission to remove access barriers for populations that otherwise might not receive timely healthcare due to geographic, economic, or social challenges. By equipping its school-based health centers with TytoCare's advanced diagnostic solution, Sunrise Clinics is ensuring that students can receive high-quality, clinician-guided exams without leaving school. With future additional state funding, Sunrise Clinics intends to expand the program's reach and enable further growth into new schools. The organization also has plans to deploy the Pro Smart Clinic across its five main clinic locations.

"Introducing TytoCare into our schools and clinics is a transformative step toward our mission of improving access to care for New Mexico's rural and underserved populations," said [Name], [Title] at Sunrise Clinics. "This initiative will not only enhance the services we already provide but will also allow us to grow our school-based programs and extend our reach to even more families in need."

"With TytoCare's Pro Smart Clinic, Sunrise Clinics is turning schools and clinics into connected care hubs, providing students and families with immediate access to quality healthcare," said Dedi Gilad, CEO and Co-Founder of TytoCare. "This partnership demonstrates the power of virtual care technology in supporting underserved communities and creating scalable, sustainable healthcare models."

### **About Sunrise Clinics**

Founded in 2019 as a 501(c)(3) nonprofit, Sunrise Clinics emerged from more than 35 years of continuous medical service by Dr. Randal Brown, who established primary care in Santa Rosa at the invitation of then-Governor Bruce King. Today we operate community and school-based clinics with primary health and behavioral health care in six rural and frontier counties — Torrance, San Miguel, Mora, Guadalupe, Quay, and Colfax — where healthcare access remains scarce.

**AboutTytoCare**

[TytoCare](#) is a virtual healthcare company that enables leading health plans and providers to deliver remote healthcare to the whole family through its Home Smart Clinic and TytoCare's Pro Smart Clinic solutions. With a cutting-edge, easy-to-use, FDA-cleared device with embedded AI, TytoCare enables families and communities to conduct remote physical exams guided by clinicians, replicating in-clinic visits for immediate answers. TytoCare drives utilization rates that are five times higher than traditional telehealth services; reduces the total cost of care by an average of five percent; diverts ED visits by an average of 10.8 percent; and has a high average NPS of 83. TytoCare serves over 250 major health systems and health plans in the U.S., Europe, Asia, Latin America, and the Middle East.
